

Technical Data Sheet

12/07/2017

Medium 199 w/ Earle's Modified Salts w/ L-Glutamine w/ 1.25g/l Sodium Bicarbonate

Product code :
LM-M1903

<u>Theoretical pH:</u>	7.3 ± 0.3
<u>Osmolality:</u>	288 mOsm/kg ±10%
<u>Colour:</u>	Red orange clear solution
<u>Storage conditions:</u>	+2 to 8°C. Protect from light
<u>Shelf life:</u>	18 months
<u>Endotoxin:</u>	<1 EU/ml
<u>Composition:</u>	Available on request
<u>Sterility Tests</u>	Bacteria aerobic-anaerobic Bacteria, strictly anaerobic Fungi/Yeast

Recommended Use:

Respect storage conditions of the product

- Do not use the product after its expiry date
- Store product in an area protected from light (not necessary for saline solutions).
- Manipulate the product in aseptic conditions (e.g. : under laminar air flow)
- Wear clothes adapted to the manipulation of the product to avoid contamination (e.g. : gloves, mask, hygiene cap, overall...)
- Sterile supplements (serum,...) should be aseptically added to sterile medium. The nature of the supplements may affect storage conditions and shelf life of the medium.

The product is intended to be used in vitro, in laboratory only. Do not use it in therapy, human or veterinary applications.

Applications:

A long term cultivation of cells required addition of a serum. When properly supplemented, Medium 199 has broad species applicability, particularly for cultivation of non-transformed cells. It is widely used in virology, vaccine production and in vitro cultivation of primary explants of mouse pancreatic epithelial and rat lens tissues.

Uses

Biosera recommends the addition of 10% Foetal Bovine Serum in the medium.

Indication of Deterioration:

The medium should be clear and free of particulate and flocculent material.

Do not use if the medium is cloudy or contains precipitate.

Other evidence of deterioration may include degradation of physical or performance characteristics.
